ARCHITECT FURNITURE CERAMIC

Interior design

Free thinking within four walls. When it comes to interior design, we love to run wild with ideas. It doesn't matter if it is a house interior, a living room, or an office space, our team is on it. We create concepts and form styles with a virtual toolkit.

We are past just designing furniture. We compose spaces, home interiors, rooms for businesses from scratch or from your vision. Our team of architects and designers work on your project tirelessly and with the most modern tools available. Give us a room and we'll make it something more.

5-axis water jet cutter	PT2040-W-PRO
CNC controlled stone milling machine	PT2040-M-PRO
Formatting circular saw	Altendorf WA 80
Column rotary crane with vacuum lifter	Comege with 500 kg BestOf Vacuum lift
Forklift	Jungheinrich TFG S50 - Nominal load capacity 5000 kg

Ceramic processing machinery

We use a wide variety of materials
in our joinery production:

Wood:

- Veneer
- Solid wood
- Compact panels
- Plywood
- MFC boards from the biggest European suppliers

Metal: steel, aluminium and copper made by the best subcontractors in Hungary

Glass

Upholstered furniture: we work with reliable Hungarian subcontractors

Ceramic:

- Atlas Plan
- Graniti Fiandre
- Materia
- Florim
- Fondovalle

Technical stones:

- Corian
- Silestone
- Technistone
- Dekton

Natural stones:

- Only with pre-cut, polished stones

Surface treatment: with subcontractors

MINIMAL
ARCHITECT FURNITURE CERAMIC

General contracting

We not only design and produce but we can deliver the full project with our team of experts, taking utmost care of the entire process. In case of global requirements we can offer GENERAL CONTRACTING within a limited radius, such as:

- ◆ **Technical consulting, project management**
- ◆ **Electrical installation**
- ◆ **Drywalls**
- ◆ **Cladding**
- ◆ **Painting, decorating, wallpapering**
- ◆ **HWAC**

* Facilities: for the moment available in Hungary only

3D scanning of indoor and outdoor spaces

Sophisticated design meets meticulous 3D space scanning of any building, room, interior, or exterior. In our opinion, for a perfect design 3D scanning is essential in any type of space whether it is an indoor or outdoor facility. This technology lays the foundation for our precise work.

- ◇ **Scanning of existing or under construction real estate**
- ◇ **Scanning of building facades**
- ◇ **Facility management with the help of 3D models**
- ◇ **Outdoor space scanning for landscape architects**
- ◇ **Technical inspection, re-measurements**

Ecological consciousness is what MINIMAL focuses on

Sustainability is a key aspect during our design and manufacturing process.

Our designer team is eco-conscious during the whole project planning process in terms of selection of materials, recycling possibilities, use of alternative energy, etc.

Both of our manufacturing lines are set in the way to leave the smallest ecological footprint by:

- Using environment-friendly materials, glues and FSC certified materials too
- Eco focused waste management,
- Keep the emission at lowest possible,
- Ensure the lowest carbon footprint.

We are in process to acquire the FSC certification for our joinery production line.
